

TISKOVÁ ZPRÁVA | PRESS RELEASE

**WE ARE LAUNCHING A MAJOR PARTNERSHIP**

With optimism and good feeling we announce the start of cooperation with company **HYDROGEN SYSTEMS s.r.o.**, which we will jointly operate in the rapidly developing market of hydrogen technologies.

As we are fully aware of the challenges that these new technologies bring, we see this step as a clear signal to our potential partners and customers that they can turn to us with confidence.

By combining the know-how of both companies, we will operate across the entire spectrum of hydrogen technologies. From design to implementation. From the production of primarily green hydrogen, to its storage, compression and transport, to its filling.

Our common goal is to offer turnkey hydrogen solutions, using the most advanced technologies to promote energy sovereignty as much as possible while helping to protect the climate.

On behalf of **HUTNÍ PROJEKT Frýdek-Místek a.s.**

Ing. Marcel Jenčo  
CEO
